

# Packt

# DevOps for Web Developers

---

***Mitesh Soni***

# About Me

- 8 years of experience in managing software for GNU/Linux
- Started working as a professional with DevOps from 2013

Video 1.1

## *The Course Overview*

# The Road Map

## Section 1

Getting Started –  
DevOps  
Concepts, Tools,  
and Technologies

## Section 3

Building the  
Code and  
Configuring the  
Build Pipeline

## Section 5

Installing and  
Configuring  
Docker

## Section 7

Deploying an  
Application in  
AWS, Azure,  
and Docker

## Section 9

Orchestrating  
Application  
Deployment

## Section 2

Continuous  
Integration with  
Jenkins 2

## Section 4

Installing and  
Configuring  
Chef

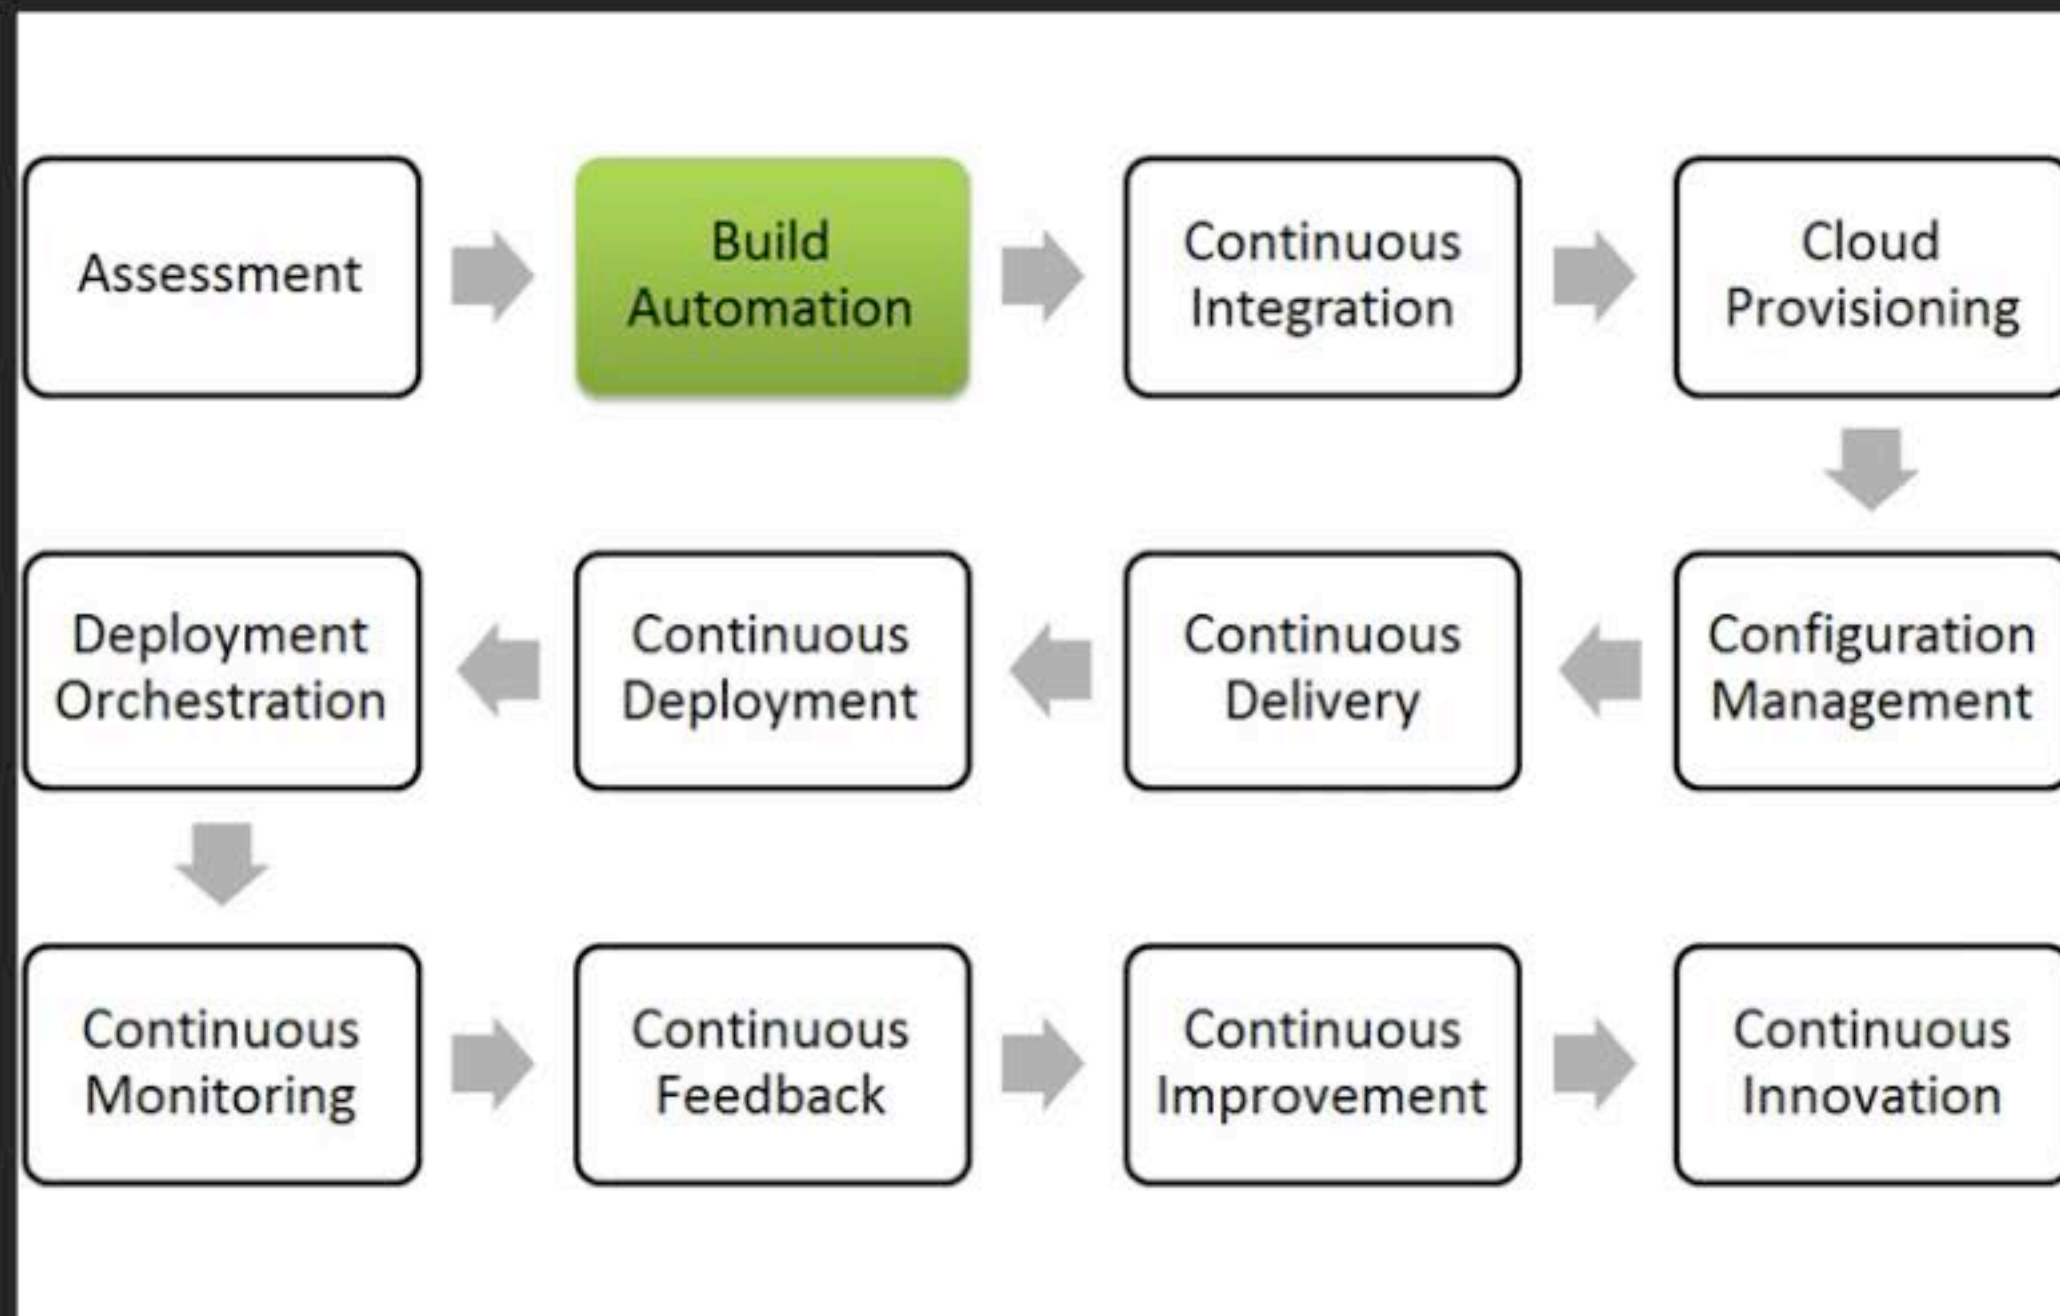

## Section 6

Cloud Provisioning  
and Configuration  
Management with  
Chef

## Section 8

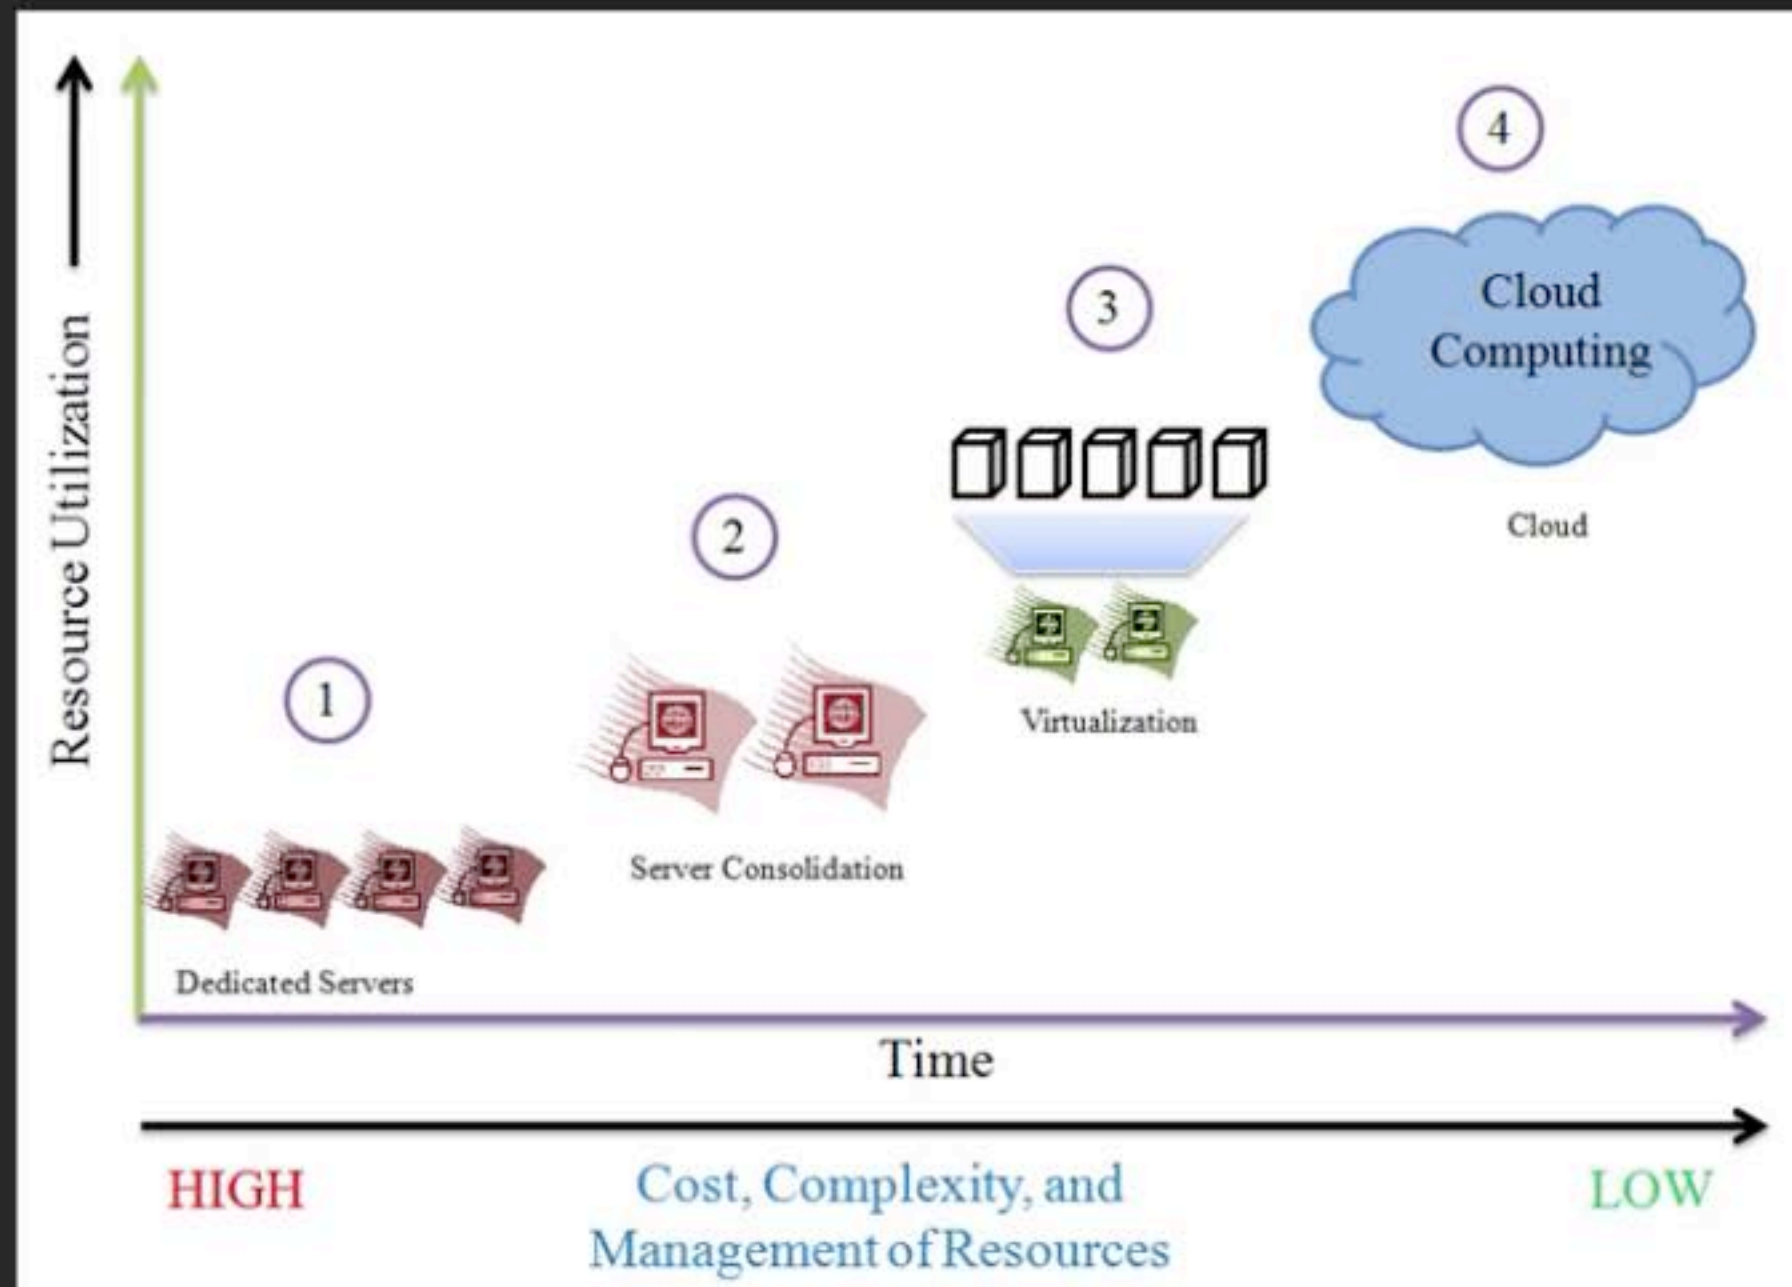

Monitoring  
Infrastructure and  
Applications

# Build Automation Pipeline

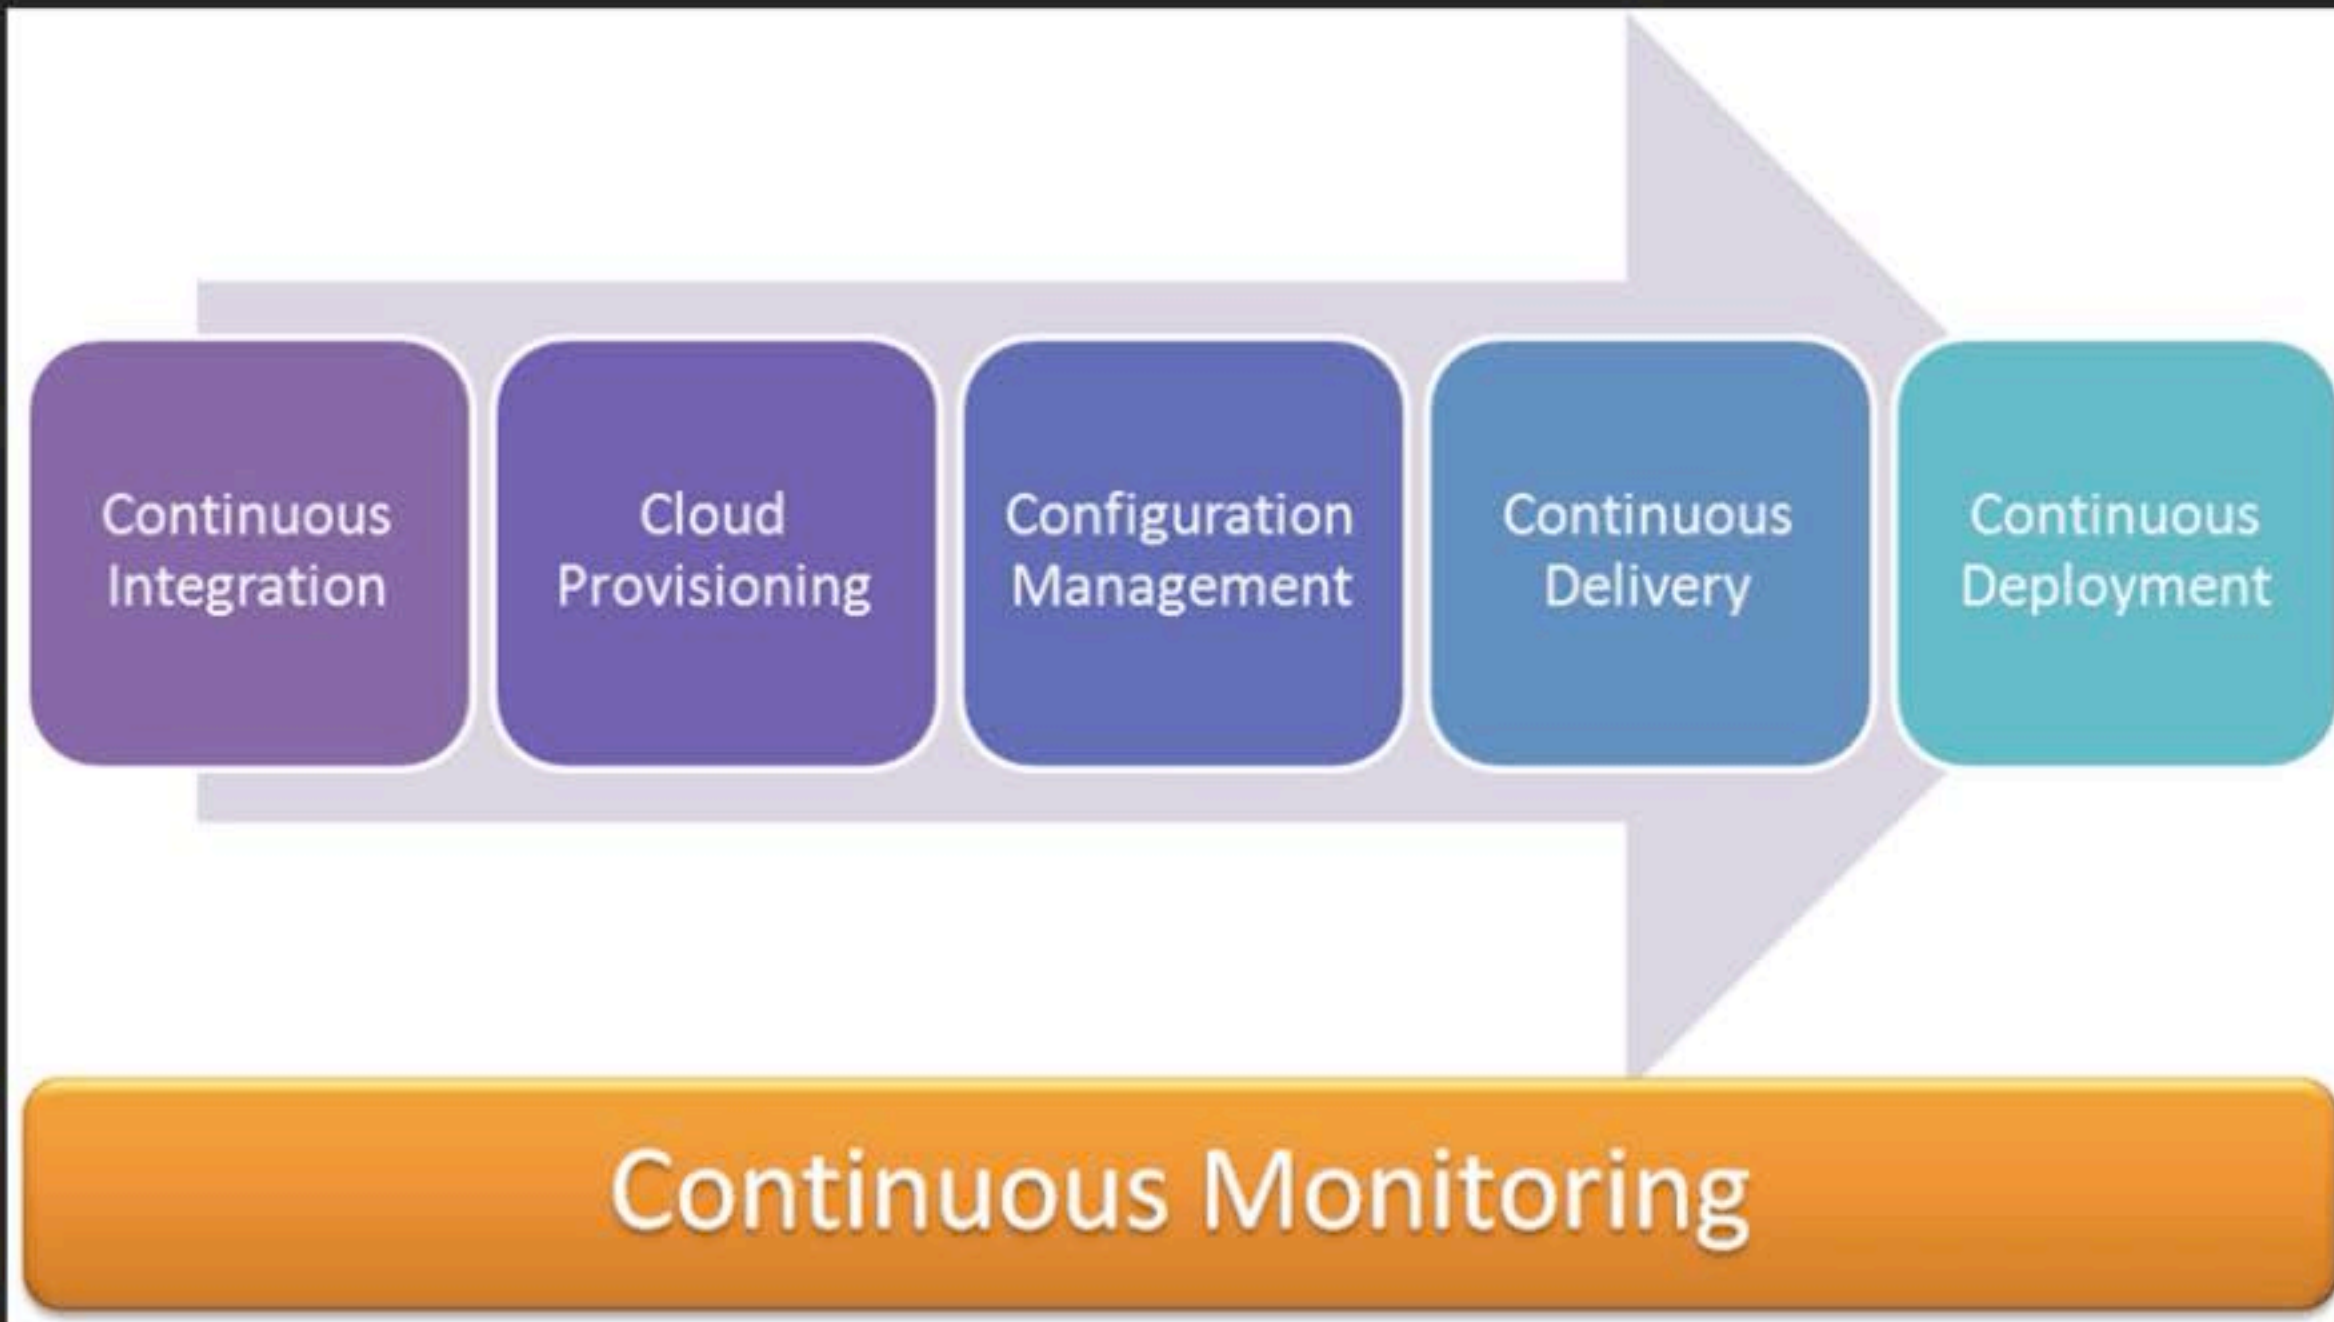

# Cloud Computing

# Continuous Monitoring

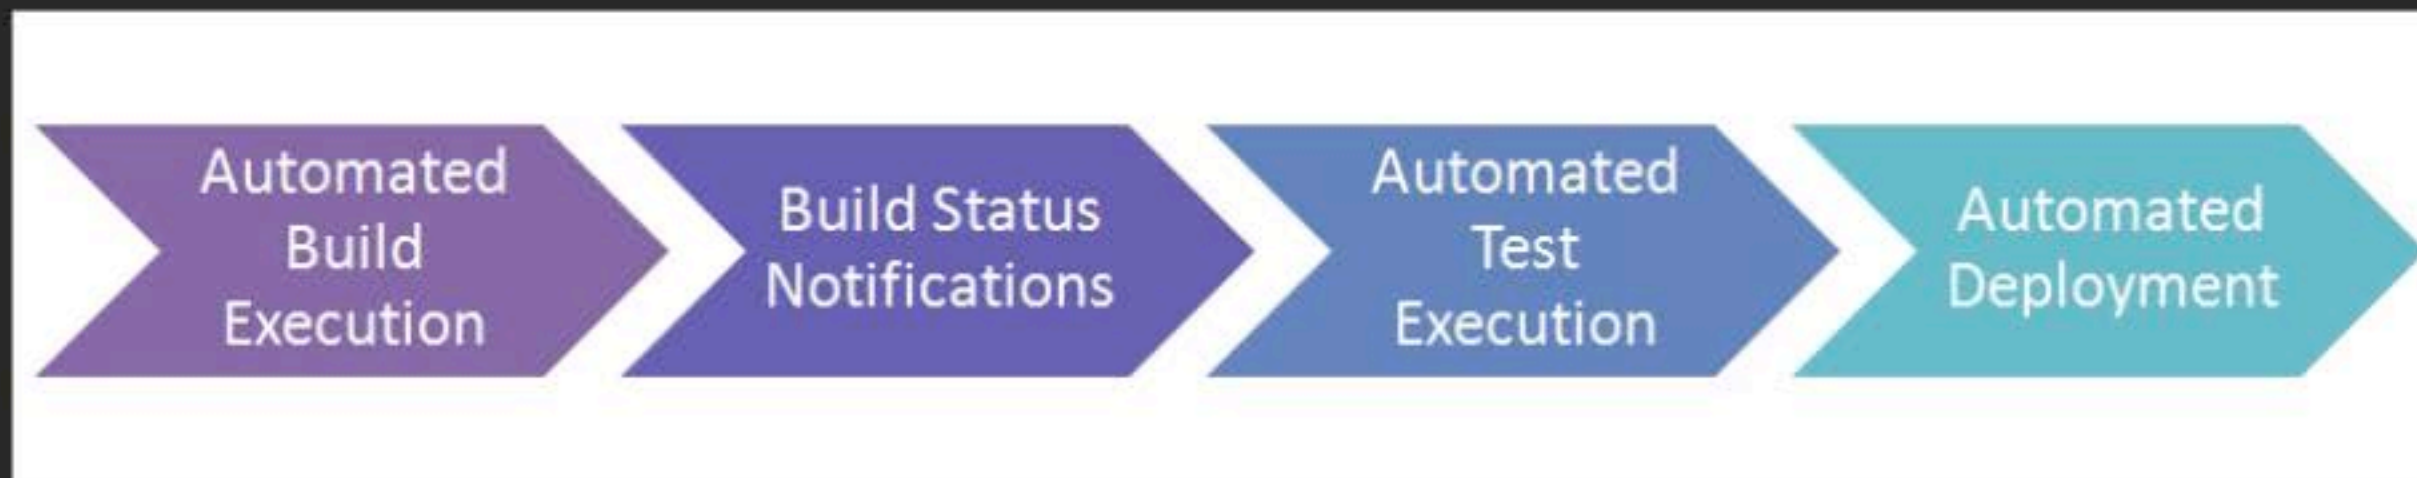

# Build Tools Maven

# Jenkins – Software Development Process

# The Road Map

## Section 1

Getting Started –  
DevOps  
Concepts, Tools,  
and Technologies

## Section 3

Building the  
Code and  
Configuring the  
Build Pipeline

## Section 5

Installing and  
Configuring  
Docker

## Section 7

Deploying an  
Application in  
AWS, Azure,  
and Docker

## Section 9

Orchestrating  
Application  
Deployment

Continuous  
Integration with  
Jenkins 2

## Section 2

Installing and  
Configuring  
Chef

## Section 4

Cloud Provisioning  
and Configuration  
Management with  
Chef

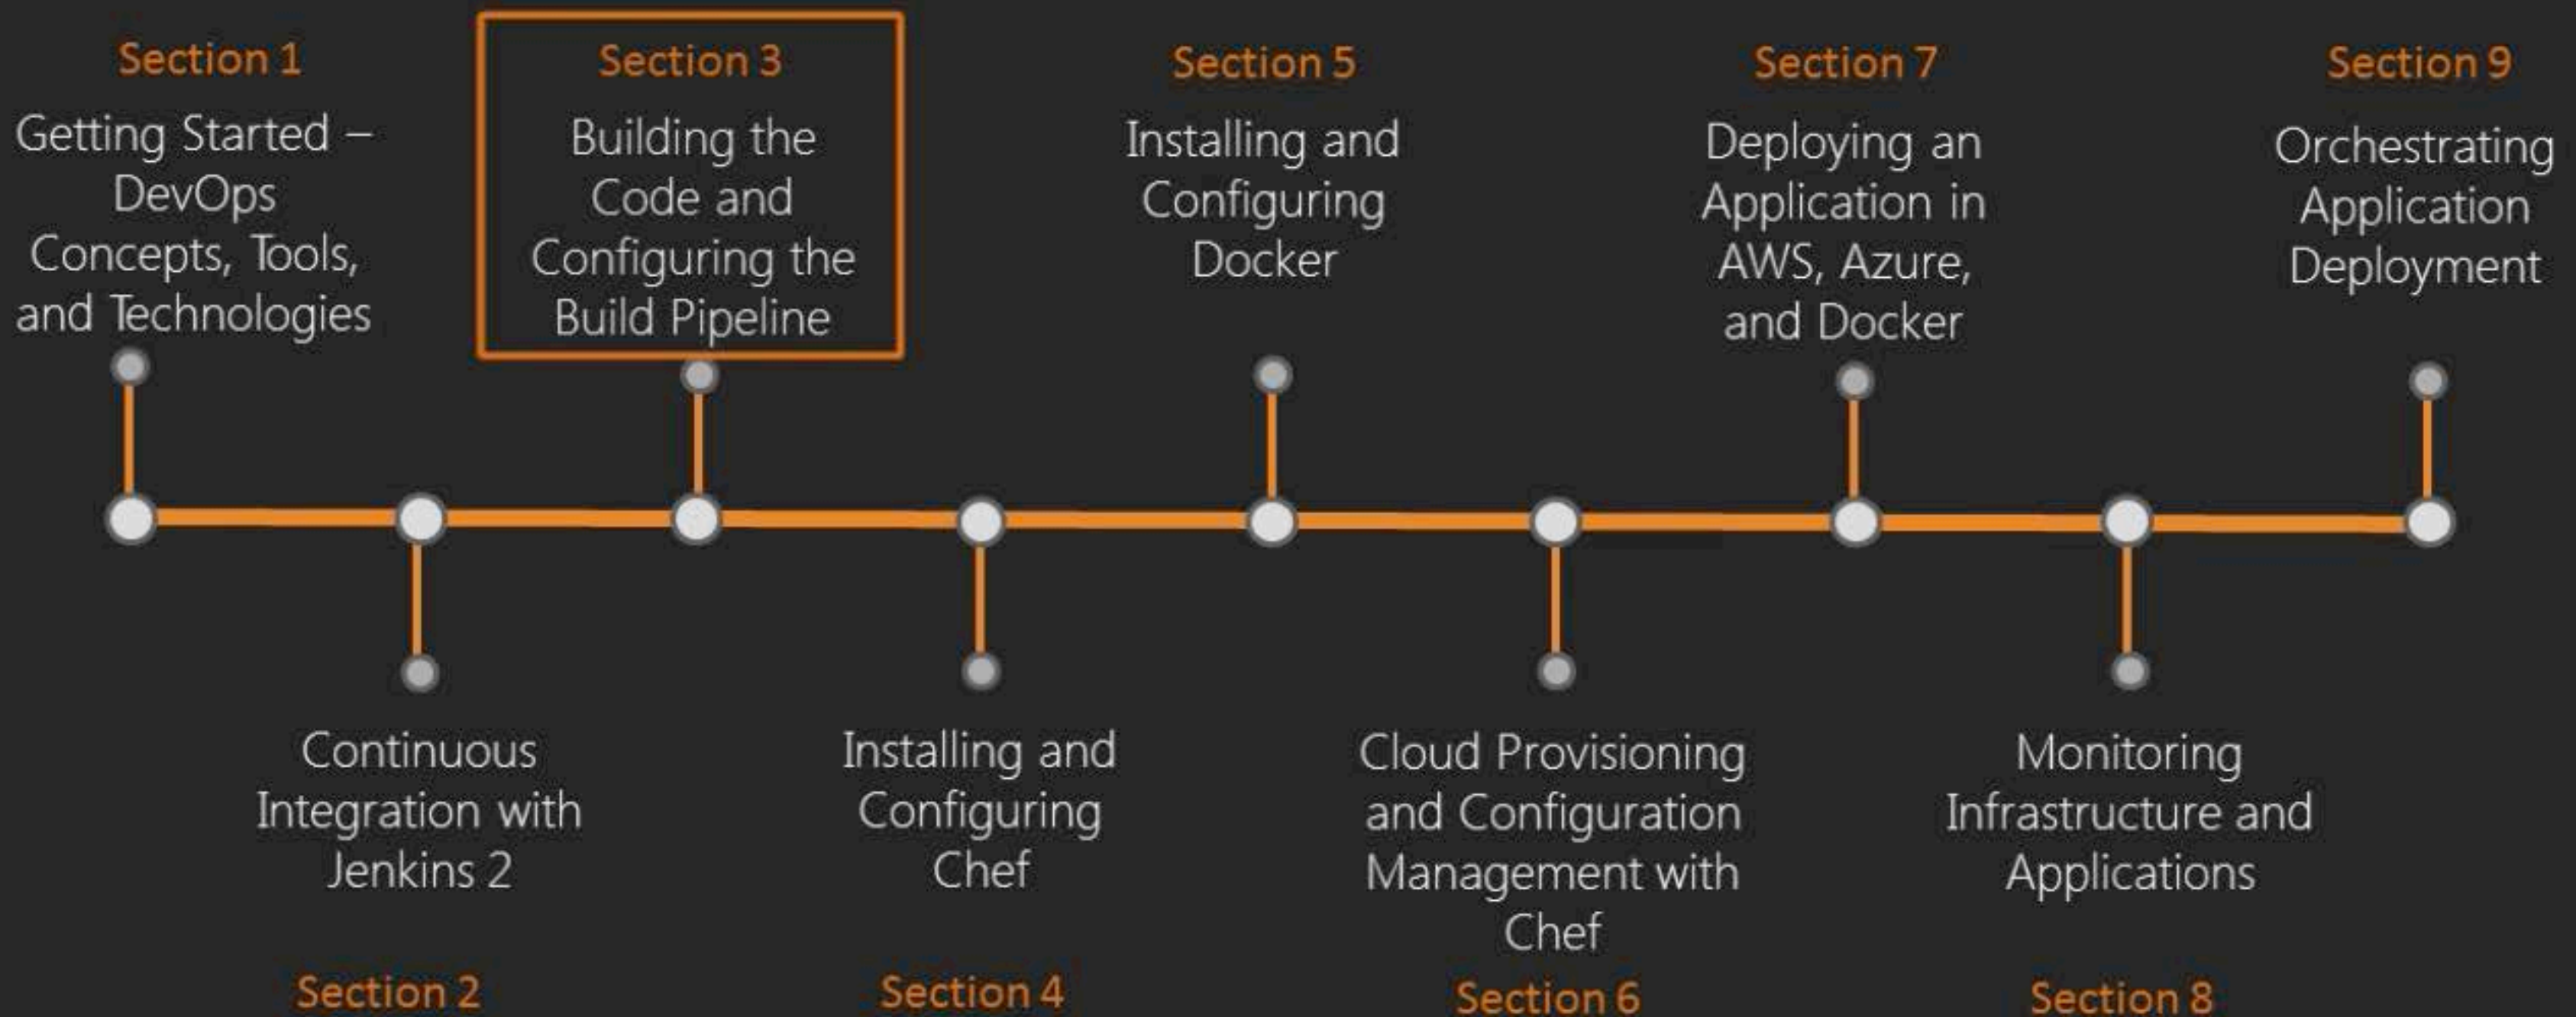

## Section 6

Monitoring  
Infrastructure and  
Applications

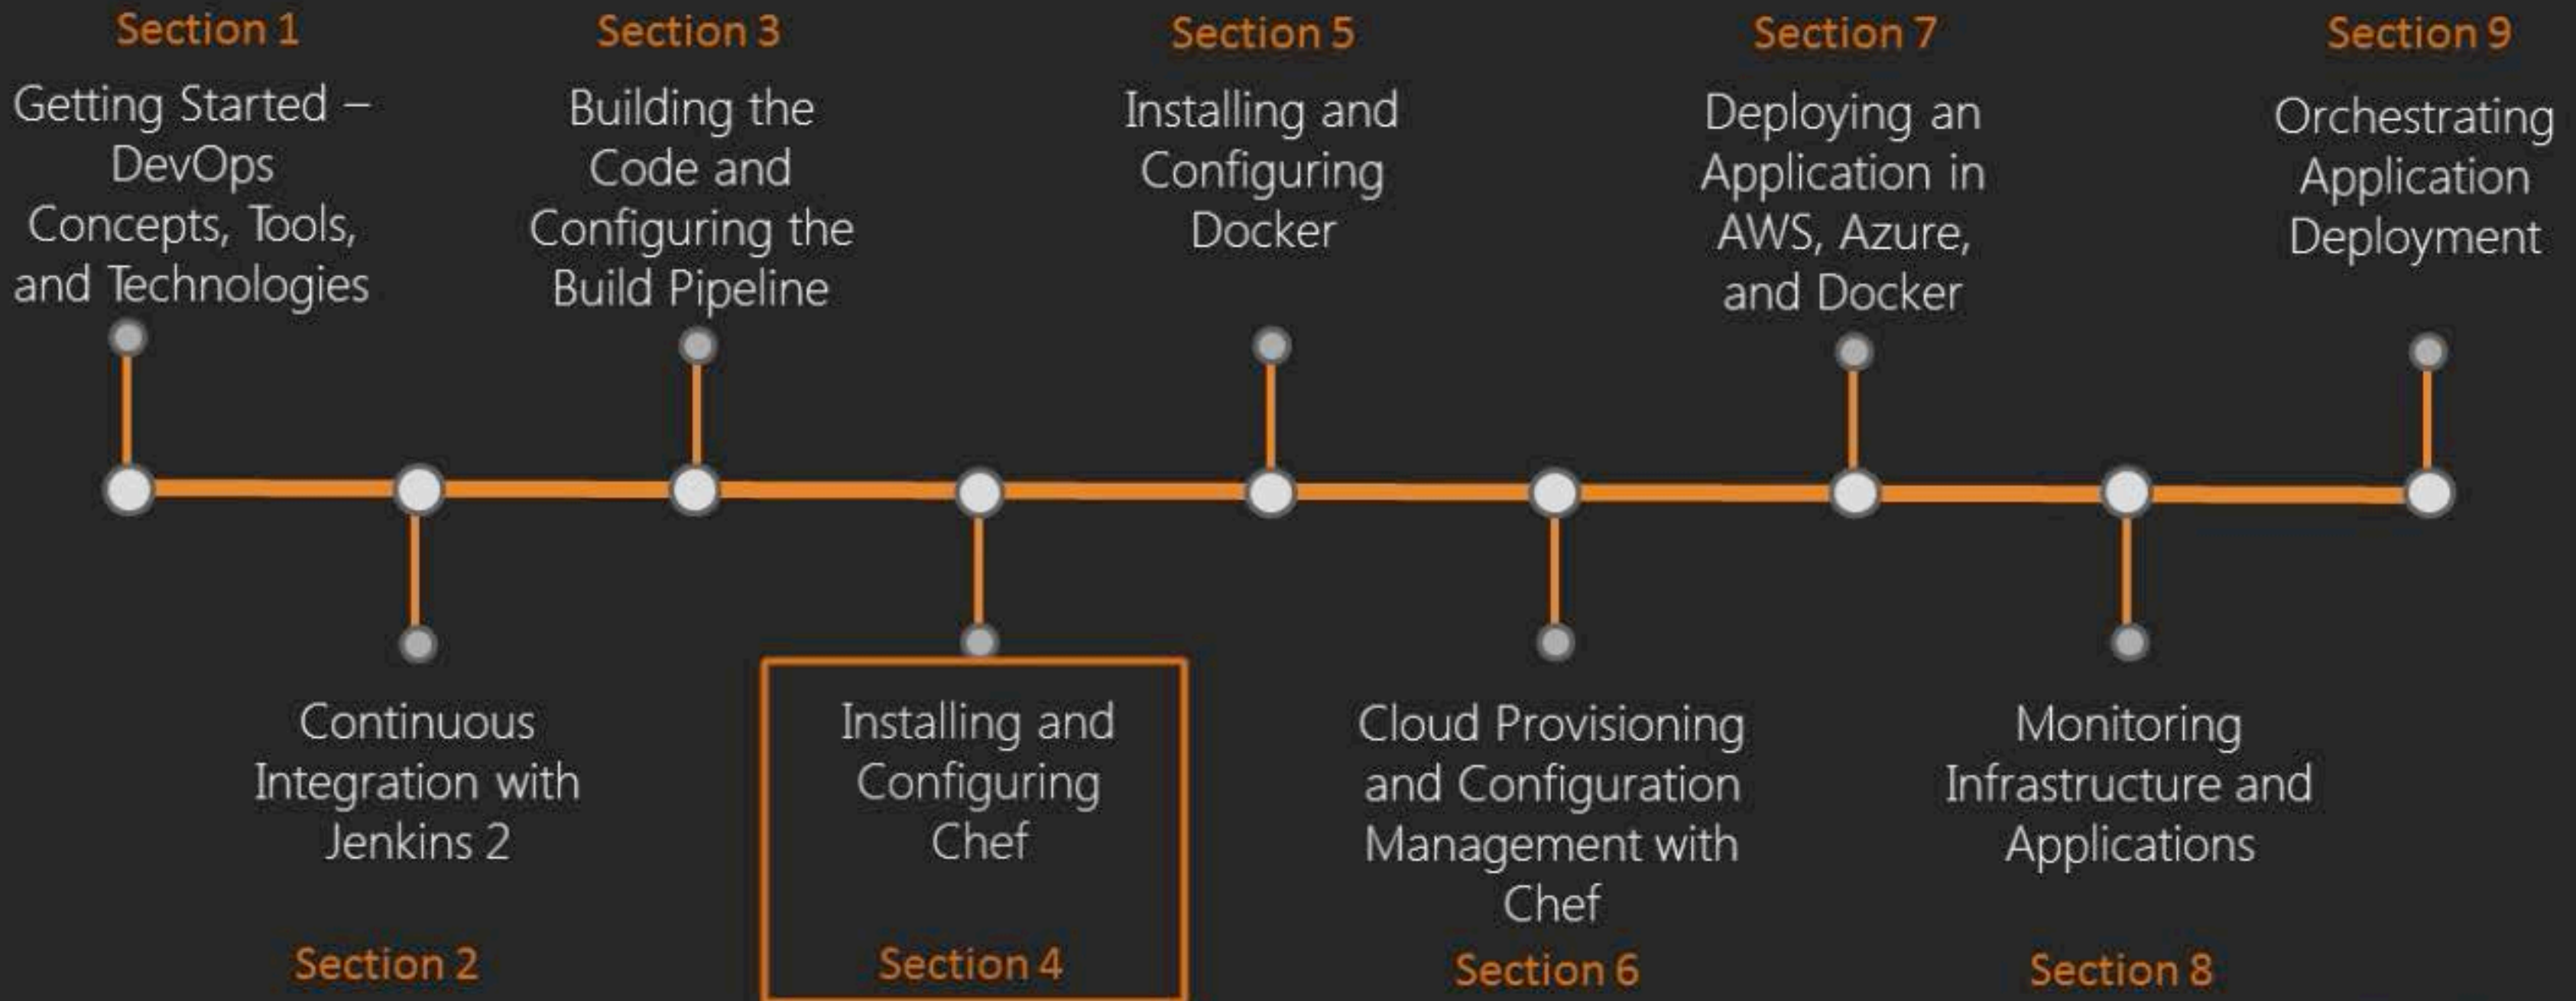

## Section 8

Monitoring  
Infrastructure and  
Applications

# The Road Map

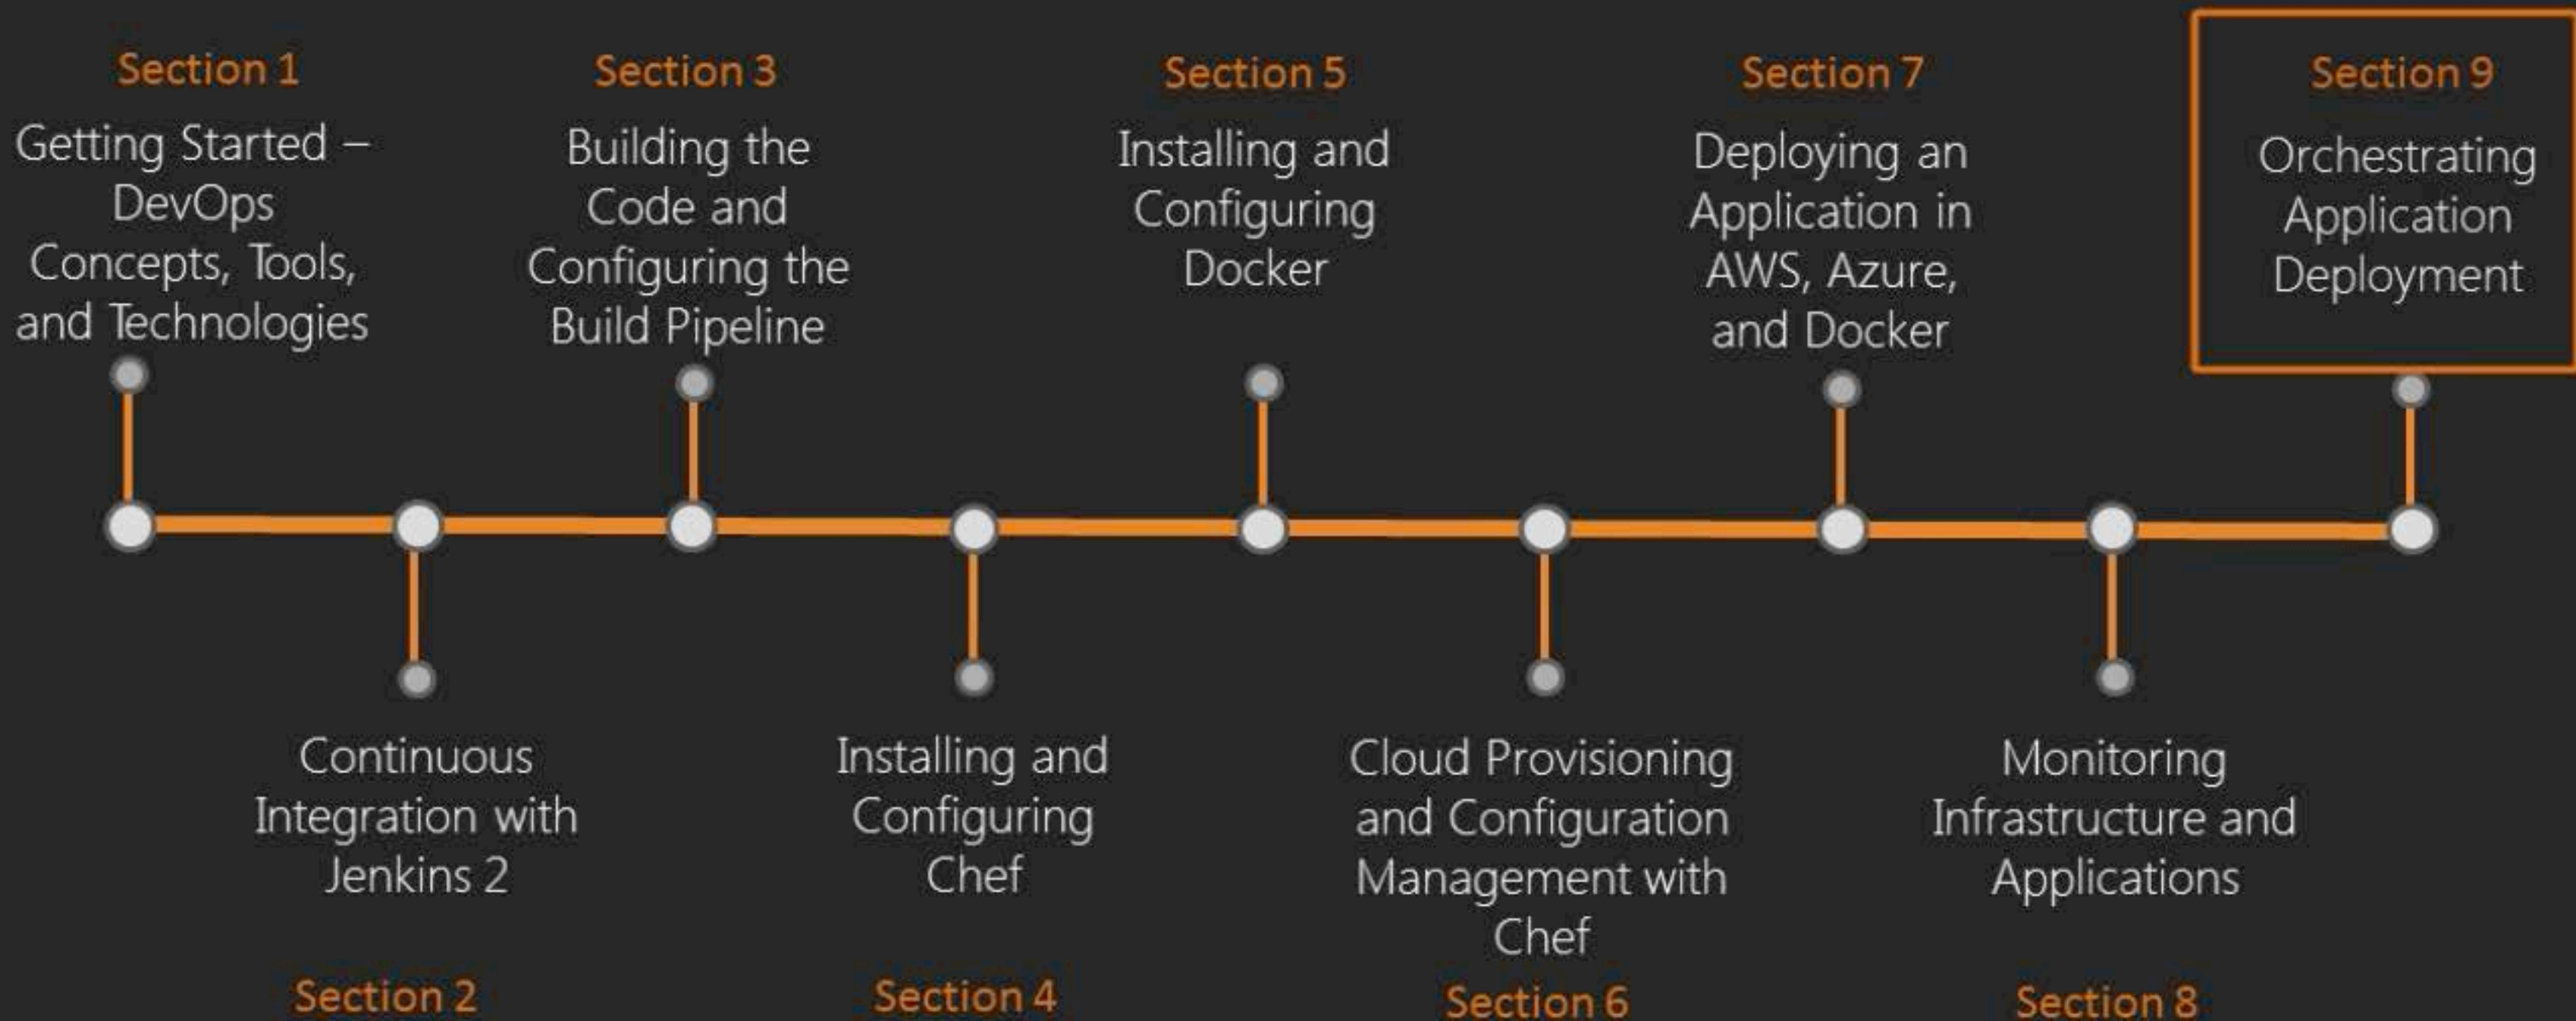

# The Road Map

# The Road Map

# Approach

- DevOps tools in a practical way to efficiently manage and automate the development
- Also deployment of a web application on to a cloud service

# Target Audience

- It is for web developers and IT teams who are new to the DevOps methodology
- It's also ideal for those who would like to learn about DevOps-oriented workflows
